

Imran Hashmi

Technology Leader | AI, DevOps, ELM & HPC

KEYNOTES · CONFERENCE SESSIONS · EXECUTIVE BRIEFINGS

Speaker one-sheet for event organizers

25+ years in enterprise software

3 regions: US, Canada, Latin America

4 focus areas: AI, DevOps, ELM and HPC

ABOUT

Imran Hashmi leads IBM's DevOps, Engineering Lifecycle Management (ELM) and high-performance computing (HPC) portfolio across the Americas. With more than 25 years in enterprise software, he speaks about how AI, automation and modern engineering practices help organizations build, deliver and scale software and compute with confidence.

He speaks to executives and engineering leaders about how AI, automation and high-performance computing translate into practical results: faster and safer software delivery, traceable engineering work and efficient use of compute. His sessions are clear, example-driven and focused on decisions technology teams can act on.

SIGNATURE TALKS

Faster to Prod. Safer by Design. Why bringing database changes into governed DevOps improves speed, compliance and resilience as AI-generated change grows.

From Faster Coding to Better Software Delivery. Engineering bottlenecks are shifting to design and decisions. What it takes to scale AI across the whole delivery lifecycle.

Orchestrating AI, HPC and Quantum Workloads. One foundation for scheduling classical, AI and emerging quantum workloads with IBM Spectrum LSF.

Securing the Delivery Pipeline. Centralized secrets management and audit trails that strengthen security and compliance without slowing deployments.

AUDIENCES

Executives and technology leaders · Engineering, DevOps, platform and HPC teams
· Conference and industry audiences · Webinars and online events

EXPERIENCE

IBM Think, TechXchange and InterConnect, plus FOST and apidays. Executive education at Harvard Business School and Boston University's Questrom School of Business.

SESSION FORMATS

Keynotes · Conference sessions · Panels · Executive briefings · Webinars · Workshops

Invite Imran to speak

Please include the event, date, audience, format and topic of interest.
